

OE
REPLACEMENT

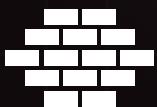

BANDS

Raybestos® Powertrain, one of the world's largest developers and suppliers of automotive friction material products, produces OE-quality transmission friction bands designed to perform in today's complex transmissions. We manufacture our bands with high-strength steel for straps that meet or exceed OE specifications, with an open-chassis design for easier installation. Best of all, Raybestos Powertrain's premium, high-energy friction material delivers superior shift quality and greater durability for your rebuild.

RECOMMENDED USE:

All automatic transmission rebuilds.
